

Ultraviolet Germicidal Irradiation (UVGI)

Wall and Ceiling Mounted UVC Light Fixtures

Effectively Disinfect Elevators and Public Restrooms with UVC Light

Ceiling Mount

Corner Mount

Features

- Tamper-proof hardware to prevent easy access to components
- 360° occupancy sensors detect motion and automatically turns fixture off for safety
- Built-in timers operate fixtures for 1, 2, 4 or 8 hours
- Includes Wi-Fi gateway to control on/off & monitor usage via a smart phone App
- Available in 2', 3' and 4' lengths and from 20 to 80 watts per fixture
- Includes one or two 254nm wavelength UVC light bulbs
- Produces no ozone or secondary contaminants
- 120-volt; 60 HZ
- Rated lamp life is 12,000 hours
- Fixture and lamps come with a one-year warranty
- Ideal for restrooms and elevators, custom color end panels available upon request
- Free VIRA (Viral Irradiation Room Analysis) available, see next page for an example

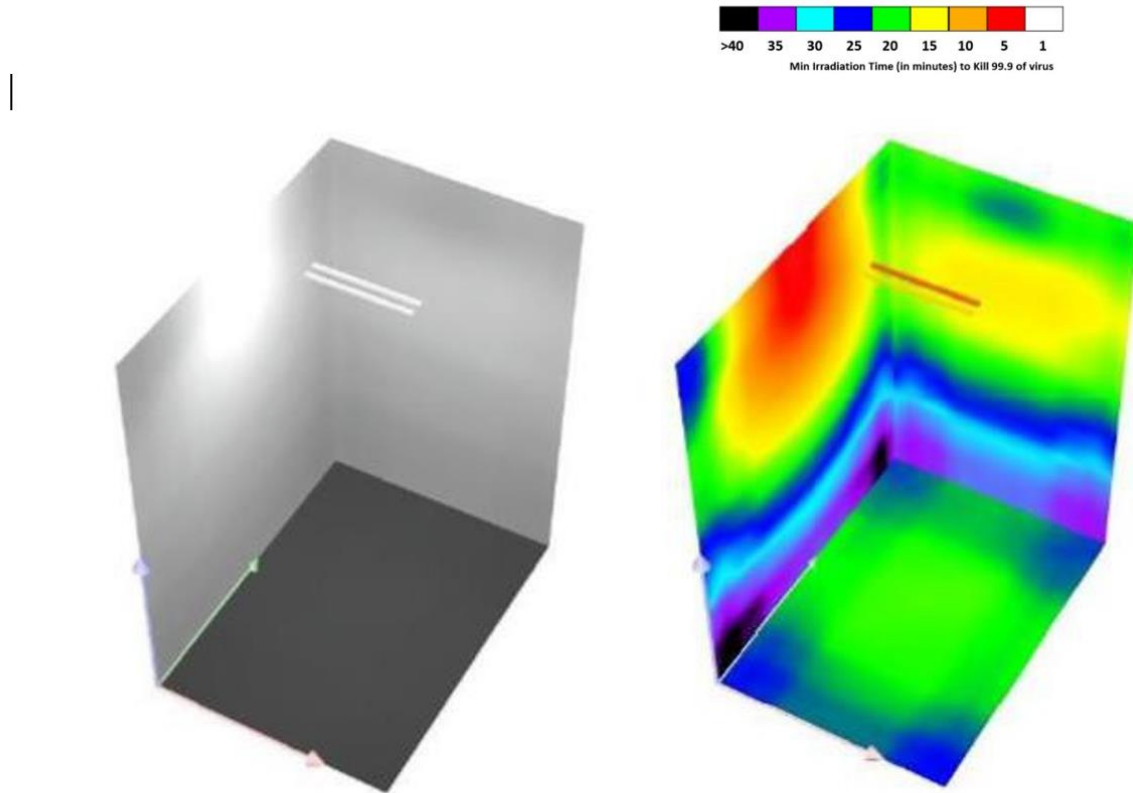

VIRA (Viral Irradiation Room Analysis)

Example: Elevator Car measuring 4.85' x 6.67'

Install: 2' wide corner mount fixture with (2) 20-watt UVC lamps

Time to irradiation: 25-30 minutes

To request a free Viral Irradiation Room Analysis

- Provide room dimensions (L x W x H)
- Along with several photos from varying perspectives showing room layout
- Heat map analysis indicates minimum irradiation time required to inactivate 99.9% of virus
- Please contact our office with any questions and for more information

We also carry a 300-watt Portable UVGI Sanitation Cart for faster irradiation time and for use in multiple applications throughout your facility. Call for details.
